North Africa in the Age of Biodiversity Genomics

WHAT IS IT ABOUT

This five-day workshop aims to establish and connect scientists and institutes that are role players in the African BioGenome Project (AfricaBP) initiative, create awareness and galvanise institutions and researchers at the regional level to drive the vision and objectives of AfricaBP.

Days 1-2 are seminar-style hybrid workshops focusing on current understanding on biodiversity genomics across Northern Africa. Days 3-5 are practical-based, hands-on in-person workshops will cover the whole genome sequencing technology, In addition, to different theoretical sessions related to the exercise, mainly Genomics & Bioinformatics.

WHO CAN ATTEND

Anyone interested in genomics, bioinformatics, molecular biology and related fields.

WHEN

11th – 13th October 2023 (08:00 - 17:00 CEST each day)

WHERE

This hybrid workshop will be held at Institut Pasteur du Maroc – Morocco “www.pasteur.ma”, North Africa. Practical exercise to hold at this location from Day 3 – 5, will cover the whole genome sequencing technology, In addition to different theoretical sessions focusing on Genomics & Bioinformatics.

REGISTRATION DEADLINES AND BARCODE

Practical workshop participants:

Monday, 28th August, 2023 @ 5 pm CEST

Other participants:

Friday, 29th September, 2023 @ 5 pm CEST
